Application/Control Number: 10/730,800

Art Unit: 2193

DETAILED ACTION

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-22, drawn to a circuit and method of floating point multiplication, class
 708, subclass 503.
 - II. Claims 23-25, drawn to a method of floating point o, classified in class 708, subclass 495.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (II) does not require the particular sequence generator of the subcombination (I) as claimed for patentability because claims to both the combination and subcombination are presented and assumed to be patentable. The omission of the specific details of the multiplier circuit in the combination is an evidence that the combination (II) does not rely on the details of the specific subcombination (I), for patentability. In addition, the subcombination (I) clearly has a separate utility as performing multiplication. Therefore, the inventions I and II are clearly distinct. There would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view

Art Unit: 2193

of their different classification, and the inventions require a different field of search. Thus, restriction for examination purposes as indicated is proper.

- 3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D. Ngo whose telephone number is (571) 272-3731. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
